

Mechanical Service & Repair

Experienced Service Team

Integrated Drive Systems employs a team of seasoned mechanics to respond to your needs. We specialize in the service and repair of brakes and clutches on drawworks and mooring winch equipment.

Our service team is available 24-hours per day, 7 days per week, and is ready to provide your field service or shop repair needs.

Our factory trained technicians are skilled in the repair of products such as Wichita, Eaton, and Twin Disc. Our brake, clutch and parts inventory combined with quality repair and fleet of service trucks results in less down time on your rig.

- Field repair of drawworks and anchor winch brakes
- Certified shop repair of nearly all brands of clutches
- Upgrades to water-cooled disc brakes
- Drawworks, hooks, blocks, swivels, catheads, rotary tables

Along with inventories of remanufactured equipment rebuilt to OEM specifications, IDS provides comprehensive engineering services to back up any project.

Customer Support Commitment

Our field service technicians are factory qualified to handle problems quickly, efficiently, and with minimum downtime. Our 24-hour hot line permits you to talk with one of our experienced services specialists. This allows your rig personnel to obtain the required help without costly delay.

IDS recognizes drillers cannot afford downtime, that's why we...

- Answer your calls 24-hours per day, 7-days per week
- Carry a large inventory of complete units and parts for major brands of brake and clutches
- Employ teams of field service technicians to provide installs and field retrofits
- Provide shop rebuilds of nearly all brands of brakes and clutches
